

PACT™ Partner Programme

The PACT™ Partner Programme is designed to help your business to improve safety and reduce costs by continually improving the management of risks associated with thermal oil systems.

Helping to inform and educate, PACT delivers all the knowledge and tools your business needs to improve plant performance and avoid catastrophic incidents.

By joining the programme, you are taking the first step towards compliance and continuous development.

PACT Gateway

The PACT™ Partner Programme is accessed via PACT Gateway – the foundation that unlocks expert, world class support to help you start your journey towards total compliance.

How PACT works

The four key modules of PACT are:

1. Fluid management programme

We sample your fluid on site for testing in our laboratory and report on our findings.

2. PACT Training

Our established training provision includes three courses: Level 1 - Annual Refresher, Level 2 - Advanced Awareness and Level 3 - Emergency Response.

3. PACT Auditing

We carry out a full system review to monitor your system integrity, conformity, safety and performance.

4. PACT Support

Our PACT Support package will guide you every step of the way and give you access to a host of expert resources.

Benefits:

- Reduced risk of fire and explosion
- Improved overall operational safety
- Increased productivity and system efficiency
- Full compliance with national and international regulations
- Significant potential reduction in insurance premiums
- Reduced business risk and implement cost savings
- Knowledge building
- A wider understanding of the impact of your operation on your thermal oil systems
