

FLUID GUARDIAN

Advanced Fluid Testing and System Insight

**System-Specific Insight.
Actionable Intelligence.**

Fluid Guardian delivers application-specific analysis, not generic comparisons or one-size-fits-all thresholds. Using advanced OPC Suite testing, it provides deeper understanding of degradation components and system behaviour.

TAILORED ANALYSIS FOR YOUR SYSTEM

Every analysis is customised to your operating conditions, delivering insight across:

- Stability
- Stress response
- Performance
- Contamination and degradation
- Overall condition

WHAT FLUID GUARDIAN DELIVERS

- Heat transfer performance optimisation
- System integrity assessment
- Fire and flammability risk evaluation
- Operational reliability insight

All grounded in real system operating parameters

MORE INFORMATION

BEYOND DATA. INTO DIAGNOSIS.

Fluid Guardian goes further than standard reporting:

- Identifies root causes of degradation
- Explains why changes are occurring
- Evaluates impact on fluid chemistry and performance
- Assesses safety, risk, and suitability

ACTIONABLE OUTCOMES

- Clear, system-specific diagnostics
- Targeted corrective actions to improve:
 - Performance
 - Safety
 - Sustainability

A SMARTER APPROACH TO FLUID MANAGEMENT

Fluid Guardian ensures:

- No unnecessary oil replacement
- Corrective actions are prioritised
- Long-term improvements prevent repeat issues

TRANSFORM INSIGHT INTO PERFORMANCE

Speak to TFS today to assess your fluid and unlock performance improvements.
